Presented by

Louis-Charles Cuierrier, **B.Sc.EE**

*Director of Sales & Marketing
Pre Engineering*

What we'll cover during this webinar :

- ✓ What is a Remote Telemetry Unit (RTU) ?
- ✓ What are the best practices to monitor a larger scale network ?
- ✓ How is a typical site managed with an RTU ?
- ✓ How can you AND your business benefit from a robust site management strategy ?
- ✓ What you should consider when shopping for a remote site management system ?
- ✓ What are the differences between both Cortex units (320 & 360) and why should you choose one model over the other ?
- ✓ What are SNMP & Modbus Protocols?
- ✓ Examples of applications and customer stories.
- ✓ Advanced remote site automation strategies.
- ✓ **Demonstration of a Live Unit.**
